ExtendProject
Project Time Management & Accounting

Features

- Web Based Time capture
- Cisco & Avaya telephony data entry
- Interactive Voice Response data capture
- Role based Security
- Employee Self Service
- Export & Data Interchange Access
- Management Reports

Benefits

- Anytime, anywhere access
- Reduce errors
- Accurate project time collection
- Project Management

Applicable Markets

- Legal Firms
- Professional Firms
- Construction Firms
- Engineering Firms
- Contract & Temporary Labor Firms

Technology

Built on Microsoft .Net technology with MS SQL server as its backend database, offers great power, security and scalability.

Offering

- Licensed Solution
- Licensed Software provided based on the number of employees maintained in the system.
- Hosted Solution
- Provided as Software as a Service (SaaS)

ExtendProject is a Web based project time keeping application which allows professionals to record their time spent on multiple projects simultaneously using various input devices such as Cisco and Avaya IP telephony systems. ExtendProject is specifically designed for busy service and project management firms providing a low cost solution for easy and timely tracking of project time. The output from ExtendProject can be imported into the corporate billing system and clients can then be billed for time allocated to various projects.

ExtendProject has been designed to include clients, projects, departments, employees and accounts as the base entities to track and allot time to. A professional can bill time to a project or simply punch in and out for more accurate time accounting.

For corporations which have IP telephony from Cisco and Avaya, each telephone can be an input station with menus on the LCD directing the user to punch in or out and bill time. The application seamlessly updates in real time the backend database of ExtendProject.

For corporations which do not want to invest in extra software and servers, we also offer ExtendProject as a hosted solution. Any firm can launch ExtendProject in a very short time after they have setup their clients, departments' employees and projects.
